Eco Art

Paint and Create

**PNO** = Parents Night Out

\*class descriptions on back 

## general notes:

**Holidays may affect schedule**

**Summer CAMPS all summer long!**

**Birthday Parties:** Play Garden is closed every Sunday and offers birthday parties for all ages. Please see our website for more details!

# class descriptions:

## Preschool Mothers Morning Out & Camps

Our preschool prep is centered around children ages 1-4 years old. Our preschool program teaches social skills, fine motor skills, communication skills, math concepts, reading skills, sign language, Spanish, yoga and more! When schools are out, join us for creative camps!

---

## Sensory Learning Center

Sensory Learning is a practical hands-on, multi-sensory, collaborative, exploratory experience. Fine and gross manipulatives are provided in a structured and authentic format allowing the child to focus for longer periods of time. Stations and centers are set up for drop in learning fun.

---

## Paint and Create

Helping your child develop a creative palette they can call their own is our goal at our paint & create class. Brush painting, sponge painting, sculpting, drawing, cutting and pasting are just a few of the ways in which our young artists express their creativity!

---

## Kids Yoga

KIDS YOGA Classes are based on the interests, energies and developmental stages of children. Playful yoga poses, animated breathing exercises and imaginative relaxation techniques, along with music, crafts, books, puppets and other age-appropriate props get the kids stretching and smiling!

---

## Meet Your MUCK

Meet Your Muck This class is like throwing your own slime party! Meet your muck is all about slime, putty, gak, flubber and making other similar substances and concoctions to experiment with different textures, sensory exploration, and hands on fun!!

---

## Eco Art

ECO ART Nature art, recycled & up cycled materials like Milk crates, egg cartons, recycled cardboard, packing material and other goods will be used to create new masterpieces designed by individual artists and environmentalists.

---

## Recycled Building

Themed classes and projects encourage inquisitive minds and team work. Recycled building and crafting bring out the engineer and artist while using recycled materials to create new works of art.

---

## Math Magicians & Lego Learning

Magicians will find math classes in just about everything—calendars, deck of cards, everyday objects: sorting blocks, clocks, popsicle sticks, legos, nature, etc. Using Lego & DUPLO manipulatives lessons form on patterns, mathematics, directions & designs, building and encouraging little engineering pros.

---

## Create & Play & Art Lab

Art Lab is an open studio format where children are introduced to a wide range of art materials. The materials change weekly, but always includes an open exploration with different themes, projects, and materials to let the creativity shine.
